Run Style Definitions

[E] A winner exhibiting a typical 'E' (or Early) run style would show the horse leading or battling for the lead through the duration of the race.
[E/P] A winner exhibiting a typical 'E/P' (or Early/Presser) run style would show the horse running 2nd or 3rd and within a few lengths early before making the winning move.
[P] A winner exhibiting a typical 'P' (or Presser) run style would show the horse running in the middle-of-the-pack early before making his winning move.
[S] A winner exhibiting a typical 'S' (Sustain or Closer) run style would show the horse running in the back-of-the-pack early before making his late winning move.
[NA] A 'NA' (or Not Available) run style is used for first-time-starters and those horses without any meaningful running lines to accurately assess the horse's preferred run style.

[Early Speed Points] Ranging from a low of 0 points to a high of 8 points, this measures the Early Speed ability of the horse based upon its running position and beaten lengths at the 1st Call in recent races at today's distance.

What do the TSN Pace and Speed Ratings measure?

The E1 PACE RATING rates how fast the horse ran from the Start to the 1st Call (2f Pace in sprints, 4f Pace in routes).
The E2 PACE RATING rates how fast the horse ran from the Start to the 2nd Call (4f Pace in sprints, 6f Pace in most routes).
The LP PACE RATING rates how fast the horse ran from the 2nd Call to the Finish.
The SPD RATING rates how fast the horse ran from Start to Finish.

Are the TSN Pace and Speed Ratings comparable across tracks?

YES. Since the TSN Speed and Pace Ratings are 'fully adjusted' (reflecting both daily and track to track variants), they are comparable across all North American racetracks.

How many points represent one length?

The TSN Pace/Speed Ratings use two different points-per-length scales: one for Pace Ratings, one for Speed Ratings.
The TSN SPEED RATINGS employ a varying points-per-length scale depending on the distance of the race. One length is approximately equal to 1 1/2 points in sprints and approximately 1 point in routes.
The TSN PACE RATINGS use a fixed scale of 2 points-per-length for all pace calls (E1, E2, LP) regardless of the race distance.

Can TSN Speed Ratings be compared across distances?

YES. TSN Speed Ratings have been designed to make easy comparisons of all races, regardless of distance. A speed rating of 85 in a sprint is theoretically equivalent to a speed rating of 85 in a route. However a sprint speed rating of 85 does not mean that the same horse is capable of earning an 85 in a route race. Horses are individuals, not machines - each horse has their own distance limitations.

How should I use the TSN Pace & Speed PARS?

The PARS represent the average Pace/Speed Ratings earned by the leader/winner of races at today's class level. An easy way to incorporate the PARS into your handicapping is to simply circle the Pace and Speed ratings of today's contestants which are comparable to or higher than the Par for today's race. By doing so, one can quickly identify the proven runners in today's race.
