Run Style Definitions

[E] A winner exhibiting a typical 'E' (or Early) run style would show the horse leading or battling for the lead through the duration of the race. An 'E' horse is any horse which typically vies for the early lead or whose better races are run on the lead. Most 'E' horses are need-the-lead types which can not reasonably be expected to successfully rate behind a pacesetter.

[E/P] A winner exhibiting a typical 'E/P' (or Early/Presser) run style would show the horse running 2nd or 3rd and within a few lengths early before making the winning move. A 'E/P' horse, like an 'E' horse, may also run on the front end. However, unlike an 'E' horse, it can reasonably be expected to successfully lay just behind a pacesetter.

[P] A winner exhibiting a typical 'P' (or Presser) run style would show the horse running in the middle-of-the-pack early before making his winning move. A 'P' horse may at times run close to the pace but rarely, if ever, challenges for the lead early. Unlike a 'S' horse, the 'P' horse doesn't typically run from the rear-of-the-pack in it's better races.

[S] A winner exhibiting a typical 'S' (Sustain or Closer) run style would show the horse running in the back-of-the-pack early before making his late winning move.

[NA] A 'NA' (or Not Available) run style is used for first-time-starters and those horses without any meaningful running lines to accurately assess the hores's preferred run style.

[Early Speed Points] Ranging from a low of 0 points to a high of 8 points, this measures the Early Speed ability of the horse based upon its running position and beaten lengths at the 1st Call in recent races at today's distance. The higher the points, the more early speed the horse has shown in recent races. The Early Speed points are displayed in the past performances after the horse name and in parenthesis alongside TSN Run Style - e.g. (P7).

[% Wire] The % of races won in a wire-to-wire fashion.

[Speed Bias] The % of races won at this track/distance by horses exhibiting early speed (either an 'Early' or 'Early/Presser' run style). The Speed Bias % provides a quick-and-easy means to determine how early speed favoring a track/distance has been playing - for the Current Meet or Current week.... the higher the %, the more speed favoring the track is playing.

[WnrAvgBL] The winner's average beaten lengths at the 1st or 2nd call.
Example: 1st Call: 3.0. The winning horse was on average, 3.0 lengths behind the leader/pacesetter at the 1st Call before making the winning move.

Track Bias Terms & Symbols

[Impact Value] The TSN Impact Value mathematically represents the effectiveness of a Running Style or Post Position at a specific track/distance. The higher the number, the better. The average Impact Value of all starts is 1.0.

(Note: The average Impact Value of all Run Styles or Post Positions may not equal 1.0 because each Run Style/Post Position category may not have the same number of starts.)

Example #1: Impact Value: 0.50

An Impact Value of 0.50 means that the run style or post position won only 1/2 it's rightful share of races - or it won 50% of the expected number of wins.

Example #2: Impact Value : 1.50

An Impact Value of 1.50 indicates that the run style or post position won 1 1/2 times it's expected share of the races - or it won 150% of the expected number of wins.

[% Races Won] Provided for each of the Running Styles, this represents the % of races won by each run style.

[Avg Win %] The average Win% for the pertinent post position category.

Note: The win% will not total 100% because the stats given are 'averages' of post position groups, e.g. post 4-7 (#4,#5,#6,#7)

[++] The BEST (most successful) run style for this track/distance. Displayed above the Impact Value when appropriate, the double-plus '++' provides a quick-and-easy means to identify the dominant/most successful run style based on Impact Value AND %RacesWon.

[+] A FAVORABLE post position/run style for this track/distance - relative to the other post positions/running styles. Displayed above the Impact Value when appropriate, the single-plus '+' provides a quick-and-easy means to identify a favorable post position/run style based on Impact Value or %RacesWon.

[RAIL] Post Position #1

[1-3] Post Positions #1, #2, #3

[4-7] Post Positions #4, #5, #6, #7

[8+] Post Positions #8, #9, #10, #11, #12 ...

Ranks each horse by their Avg Distance / Surface Speed Rating and neatly summarizes other statistics :

#	Horsename	Morning Line Odds	Days Since Last Race	Run Style	T	Avg Pace & Speed at Distance/Surface			Avg Race Rtnng	Final Speed			ACL	Rcg Spd Avg	TSN Race Ratings of Last 3 Starts			Mud Spd	Pedigree Stats

- * * - Indicates at least two races were used for the horse's average pace & speed figures at the distance/surface.
- () - Indicates that the horse's average pace & speed figures at the distance/surface were not run recently.
- no symbols next to the average pace & speed figures indicates that only one race was used for the average.

Ranks each horse on several Key Factors :

Definitions :

- Back Speed** - The best TSN Speed Rating the horse has earned at a distance/surface comparable to today's race.
- Current Class** - The average of the TSN Class Ratings recently run at today's distance/surface category.
- Average Class Last 3** - The average of the TSN Class Ratings in the horse's last 3 races.
- Power Rating** - An incredibly potent power rating encompassing several factors (speed, class, pace, weight, etc) into one easy to use rating.
- Early Pace** - The 2nd call TSN pace rating of the horse's most recent race.
- Late Pace** - The TSN Late Pace Rating of the horse's most recent race.
- E1** - 1st Call TSN Pace Rating. Rates how fast the horse ran from the Start to the 1st call (2F in sprints, 4F in routes).
- E2** - 2nd Call TSN Pace Rating. Rates how fast the horse ran from the Start to the 2nd call (4F in sprints, 6F in most routes).
- Late** - TSN Late Pace Rating. Rates how fast the horse ran from the 2nd call to the Finish.
- Avg Race Rating** - The average TSN Race Rating for the races represented in the horse's avg pace & speed figures.
- Best Pace** - The best TSN Pace Ratings (excluding muddy/sloppy races) the horse has earned at today's distance/surface category.
- ACL** - Average Competitive Level - reflects the avg race rating of the horse's most recent in-the-money finishes and also its consistency over that time period.
- Mud Speed** - The best TSN Speed Rating the horse has earned within the last year on a muddy or sloppy track.
- Sire Production Index** - Indicates the average racing class of a stallion's foals. The higher the number, the better the sire.
- Dam production Index** - Indicates the average racing class of a mare's foals. The higher the number, the better the dam.
